REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on the PTO-892 each disclose a method and apparatus for controlling a laser driver in a read and/or write mode.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest an optical disk recording and reproducing apparatus and method, the apparatus being operative in a read mode and a write mode for controlling a laser driver as described in the claims and further including performing a writing operation in the bottom sampling period at different linear velocities so as to sample at least first and second bottom levels; monitoring a linear velocity at a point where the signal is to be recorded in the write mode; and calculating the target bottom level for the monitored linear velocity by interpolation of the sampled first and second bottom levels, thereby outputting a bottom level control signal to control the laser driver according to a difference between the calculated target bottom level and a detected bottom level of the laser power.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 703-308-1549.
